

Tadaa!

Using sound as an Information Radiator

James Bloomer

An Information Radiator is a display posted in a place where people can see it as they work or walk by. It shows readers information they care about without having to ask anyone a question.

- Alistair Cockburn

An Information Radiator

**THE BUILD
IS
BROKEN!**

Why use sound?

Some developers never look up.

Not just for builds.

...bugs raised and fixed.

...features finished.

...releases.

...load balancer health.

Change the theme of the sounds for
your entertainment.

Tadaa, an audio information radiator
